

## Busworld Kortrijk 2017

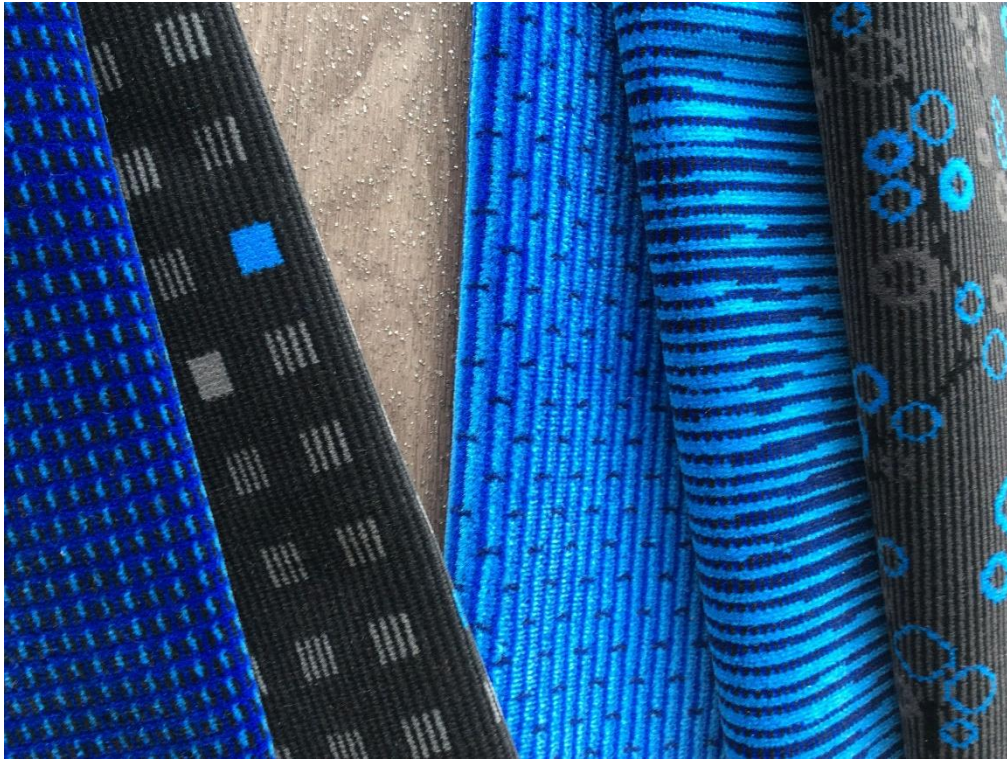

### **Lantal's new trend collections make ambitious bus interior visions come true**

**As a partner to all major, globally active vehicle and seat makers and to more than 100 public mass transit and bus network operators, Lantal is showcasing the decisive advantages of its coherent all-in-one solutions at Busworld in Kortrijk from October 20 to 25, 2017.**

**At Stand 430 in Hall 4, visitors can gain exciting first-hand impressions of new seat cover designs for the interiors of city and intercity buses and tour coaches alongside innovative products as well as remarkable visualization techniques.**

Whether on an extended trip aboard a tour coach or during the daily commute with a city bus, the interior always decisively influences the well-being of the traveler. At Lantal, this factor is always in the focus and has a major impact on the company's everyday work.

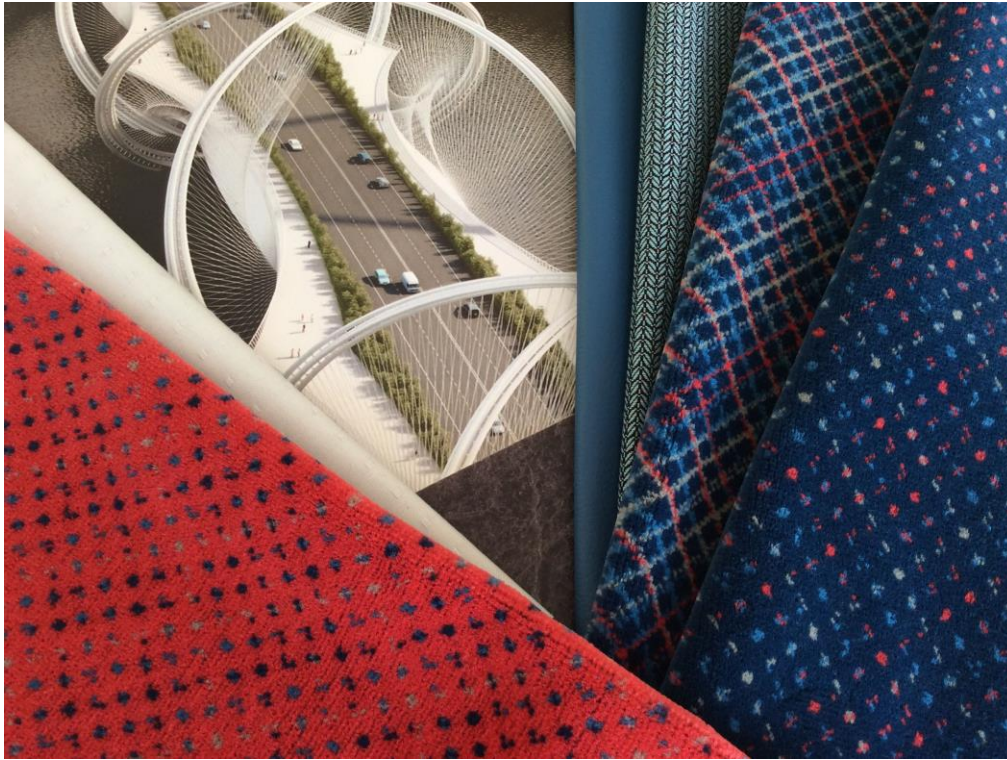

Lantal helps bus operators and coachbuilders configure harmonious and functional interiors. With access to all-encompassing solutions, customers can fully rely on Lantal's competent counsel and support. The seat covers that Lantal has developed explicitly for the bus market fulfill all relevant standards and specifications.

### **Citybus collection – a companion to Essentials Stock**

This year, Lantal is presenting new Citybus designs that ideally complement the Essentials Stock off-the-shelf portfolio. Apart from subtle and elegant shades and patterns, the collection also stands out with luminous colors that highlight the operator's brand inside the bus or lend themselves to striking mix-and-match ambiance styles. Lantal's Essentials Stock products offer numerous advantages. Integrated in scores of coordination options, the products express style, clarity, and taste. Moreover, the broad spectrum of modern and classic designs saves time and money during the development phase.

But needless to say, signature-specific modification requests can be accommodated as well. All Essentials Stock items are available off the shelf even in small quantities.

### **Conceptual Forecast 2017 – the trend collection**

Lantal's design team permanently monitors the latest trends. The key megatrends and insights from trendscouting inspired the new Lantal Trendletter, which constitutes the foundation of Lantal's Conceptual Forecast collection. The new Conceptual Forecast 2017 for seat covers extends across three classes: Modern Luxury, New Premium, and Premium Light. Whether dark colors and fine-drawn patterns as in the Modern Luxury class or the vibrantly matched colors and extraordinary designs of New Premium – the customer's individual choices are practically unlimited.

Perfectly matched seat covers, headrest covers, curtains, and carpets will express the operator's corporate design and quality philosophy.

**Lantal Bus App – for interactive visualization**

To truly experience an interior and show its impact, the interaction of seats, carpets, curtains, wallcoverings, and headliners has to be visualized. This year again, Lantal's innovative Bus App does exactly that. With the app, customers can let their imagination roam free across the latest collections and configure interiors to expedite and simplify the decision-making process.
